### SUMMARY

Established in 2002, VIGILENZ® Medical Devices, a wholly owned Malaysian company was conceptualized and established on the sole premise of being an alternative supplier of medical and surgical products primarily in Malaysia and then globally.

VIGILENZ® made its first international breakthrough with two countries. And now the company has burgeoned from its traditional home base to covering over 26 countries. With its modern ISO class 8 production [100k] facility in Penang, Malaysia, added with highly trained and motivated personnel, VIGILENZ® offers unsurpassed quality of products.

Starting with its surgical suture range of products, Hernia Mesh, Infection control and wound management products.

With an excellent quality system ISO 13485:2016 in place, VIGILENZ® today is a design & development company with Class III CE marked products. VIGILENZ® is the first Malaysian company to attain a Class III CE marked products.

The company's objective is around the area of research and development in collaboration with Universities to focus on new developments that are all strictly developed according to Medical Devices Regulation. Current research within the company focusses on biomaterial for medical application, Infection Control and wound management products. Collaboration with 3 local universities is geared towards commercialization.
